Bhupender

Data Analyst | Reporting Analyst | BI Analyst

Warsaw, Poland | +48 453 247 555 | bb.datasage@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of combined experience supporting finance, operations, and business reporting across service-based and manufacturing environments. Skilled in SQL, Python, Power BI, Excel, and Azure-supported workflows, with hands-on experience in requirements gathering, KPI/SLA definition, data validation, reconciliation, dashboard development, and reporting automation. Strong at translating business needs into accurate, decision-ready reports and dashboards.

CORE SKILLS

SQL, Python (Pandas, NumPy), Excel, Power BI, DAX, Power Query, Tableau, Git, Jira, Reporting Automation, Data Validation, Data Reconciliation, Dashboard Development, KPI Reporting, EDA, Pareto Analysis, Data Modeling, Azure Blob Storage, Azure Data Factory, Databricks Notebooks, Requirements Gathering, Stakeholder Management.

PROFESSIONAL EXPERIENCE

SoftTech Solutions | Data Analyst | Remote | Jul 2023 - Jan 2026

- Partnered with finance, operations, and business stakeholders to gather reporting requirements, define KPI/SLA logic, document metric definitions, and align source systems, report cadence, and expected outputs.
- Extracted, cleaned, and prepared recurring finance and operational datasets, including invoice and payment records, budget summaries, transactional extracts, sales data, and system-generated files, using SQL, Python, and Excel Power Query; reduced manual data preparation by ~4 hours per reporting cycle.
- Built end-to-end data validation and reconciliation checks across freshness, row counts, null and duplicate records, schema, and referential integrity; reduced recurring reporting defects by 40% (5 to 3 per month).
- Reconciled source extracts, transformed datasets, and final reports by comparing totals, counts, and record-level details to identify missing records, duplicate entries, and logic-based variances before stakeholder delivery.
- Analyzed sales across 20+ SKUs and 15+ distributors using EDA and Pareto analysis; delivered weekly and monthly insights for performance tracking and planning.
- Structured reporting data into lightweight fact and dimension models and built Power BI dashboards with DAX, drill-downs, and row-level security; improved dashboard consistency and contributed to reporting automation that saved ~184 hours annually.
- Supported Azure-based reporting workflows by validating Blob Storage files, checking ADF refresh outputs, assisting with source-to-target mapping, and using notebooks for ad hoc validation and historical backfills.

Amzen Machines Pvt. Ltd | IT Intern | India | Jul 2022 - May 2023

- Cleaned, organized, and maintained Excel-based operational data for production tracking, inspection follow-up, material status, and routine internal reporting in a manufacturing environment.
- Consolidated data from multiple files into structured trackers and summary sheets, improving visibility into pending, ongoing, and completed activities.
- Performed data quality checks on missing values, duplicate records, inconsistent formats, and status mismatches to improve reporting accuracy and record reliability.
- Prepared recurring operational summaries and documentation to support internal review and workflow monitoring.

SELECTED PROJECTS

- **Reporting Automation & Validation Workflow -** Designed recurring validation checks and reporting steps using SQL, Python, Excel Power Query, and Power BI to improve report accuracy and reduce manual effort.
- **Big Data-Driven Insights: Trends in IT Skills for Education -** Analyzed IT job-market data from JustJoinIT using Python, PySpark, Dask, Azure, and GCP; built Power BI and Matplotlib dashboards to identify trends in skills, salaries, seniority levels, and regional demand.
- **GitHub Topics Scraper -** Built a Python-based data collection workflow using requests, Beautiful Soup, and pandas to extract, clean, and structure repository-level data from GitHub Topics into CSV and analysis-ready tables.
- **Vampire Diaries Viewership Analysis** - Performed Python-based trend analysis and visual reporting on episode and season-level viewership data to identify audience patterns, drop-off points, and popularity trends.

EDUCATION

Master's in Data Science & Business Analytics | University of Warsaw, Poland | 2023 - Present
Bachelor's in Computer Science & Engineering | Maharshi Dayanand University, India | 2018 - 2022
Additional Training: Data Science & Machine Learning Program | Scaler Academy / Woolf University | 2023 - Present

CERTIFICATIONS

- Anti-Money Laundering (AML) - University of Warsaw
- Microsoft Azure Machine Learning for Data Scientists - Microsoft
- Create Machine Learning Models in Microsoft Azure - Microsoft
- Python Libraries for Data Analysis - Scaler Academy
